OPTICAL EXHIBITION AND SPONSORING

The European Optical Society Annual meeting (EOSAM) is a major international scientific conference with an exhibition, held 11 - 15 September 2023 in Dijon, France, at the Dijon Exhibition and Convention Center (Palais des congrès de Dijon).

EOSAM was established specifically to provide a platform for experts in the field of optics and photonics, bringing forth new research results, the state of the art, and bridging the gap between research, education, and industry. EOS provides the companies with a perfect setting to promote their expertise and products, create new leads, and strengthen the existing ones.

EOSAM is attended by over 500 attendees each year, including top researchers, key leaders, students and industry experts from over 30 different countries all over the world. EOSAM has been organized since 2006 in France, Scotland, Germany, the Netherlands, Italy and Portugal.
